Referee comment on "Climate signals in stable carbon and hydrogen isotopes of lignin methoxy groups from southern German beech trees" by Anna Wieland et al., Clim. Past Discuss., <https://doi.org/10.5194/cp-2021-135-RC3>, 2022

The authors seem to have dealt with all my concerns but unfortunately I cannot see the new altered manuscript. It seems I am still looking at the older manuscript (or i may be doing something wrong).
