Author comment on "Recession or resilience? Long-range socioeconomic consequences of the 17th century volcanic eruptions in northern Fennoscandia" by Heli Huhtamaa et al., Clim. Past Discuss., <https://doi.org/10.5194/cp-2021-147-AC1>, 2021

Dear Joseph Manning,

Thank you kindly for the encouraging review. We will provide you a detailed reply as soon as the open discussion period ends. However, I would like to point out one minor issue. The population size of the study area is c. 91150 persons (not from 90 to 150 persons). Perhaps this clarifies some concerns?

We will address carefully all the other matters you raised after we have received the other review(s).

Kind regards on behalf of all the authors,

Heli Huhtamaa
