## **Notification of edit in figure 10**

Giulia Sinnl et al.

---

Author comment on "A multi-ice-core, annual-layer-counted Greenland ice-core  
chronology for the last 3800 years: GICC21" by Giulia Sinnl et al., Clim. Past Discuss.,  
<https://doi.org/10.5194/cp-2021-155-AC1>, 2021

---

We intend to edit fig.10 as shown in the attachment. We kindly ask readers/reviewers to refer to the new figure and the values therein instead of the one shown in the manuscript.

Two changes were made: the isotope stack was altered in response to a data-availability issue (fig 10 b.1) and the duration of the layer thickness minimum was re-measured after fixing a coding issue (fig. 10 c.3). These changes to fig.10 do not affect the conclusions of the rest of the manuscript.

We apologize for the inconvenience.

Giulia Sinnl
