Editor comment on "Maastrichtian–Rupelian paleoclimates in the southwest Pacific – a critical re-evaluation of biomarker paleothermometry and dinoflagellate cyst paleoecology at Ocean Drilling Program Site 1172" by Peter K. Bijl et al., Clim. Past Discuss., <https://doi.org/10.5194/cp-2021-18-EC1>, 2021

Editor reply: Reviewer 2 has raised several questions or suggestions but only the reply to the general comment and some of the specific comments are outlined here. (e.g. there is no response to the comment about hyperthermals, Australian hinterland being flagged....). Can the authors please upload their remaining responses to the Reviewer: do you disagree or plan to include these suggestions from Reviewer 2?
