Aleix Cortina-Guerra et al.

Author comment on "Northern Hemisphere atmospheric pattern enhancing Eastern Mediterranean Transient-type events during the past 1000 years" by Aleix Cortina-Guerra et al., Clim. Past Discuss., <https://doi.org/10.5194/cp-2021-24-AC1>, 2021

Dear Reviewer,

First of all thank you very much for your comments and suggestions.

Below I will reply one by one:

1. Authors are advised to use the symbol $^{\circ}$ or the superscribed O instead of the superscribed 0. Please review the abstract (it is 20° NOT 200....etc) and Page 3 L 86 and L 96.

We are going to use the symbol $^{\circ}$ throughout the manuscript

2. In Equation (1) I suggest using the symbol Δ to express the difference instead of \square , which may mislead to the nabla of the partial differential vectors.

We are going to use symbol Δ as suggested by the reviewer.

3. Reference Legutke et al. (2003) should be corrected to Zorita et al. (2003) and re-written correctly in the reference list.

We are going to change reference as suggested by the reviewer.

4. Either change the reference Crowley et al. (2000) in the manuscript to Crowley (2000) OR add it to the reference list.

We are going to change reference Crowley et al. (2000) by Crowley (2000)

Best regards,

A.C.
