Comment on cp-2022-30
Matthew Huber

Community comment on "How changing the height of the Antarctic ice sheet affects global climate: A mid-Pliocene case study" by Xiaofang Huang et al., Clim. Past Discuss., https://doi.org/10.5194/cp-2022-30-CC1, 2022

Unfortunately I do not have time to write a formal review of this paper (wish I did, but I'm busy over in Paleoceanography and Paleoclimatology). You may want to consider discussing these results in light of the following papers:

Goldner et al. 2014 https://www.nature.com/articles/nature13597
Knorr et al 2014 https://www.nature.com/articles/ngeo2119
