Author comment on "Drought increase since the mid-20th century in the northern South American Altiplano revealed by a 389-year precipitation record" by Mariano S. Morales et al., Clim. Past Discuss., <https://doi.org/10.5194/cp-2022-37-AC1>, 2022

---

Dear editor Keely Mills,

Please, find attached our responses to the reviewer 1 comments on our submission to *Climate of the Past*, entitled "Drought increased since the mid-20<sup>th</sup> century in the northern South American Altiplano revealed by a 389-year precipitation record".

We have prepared a new version of the manuscript that addresses most of the comments from the reviewer. In preparing this new version, we have included the two figures that were in the SI to the main text. Figure S1 is now part of Figure 2, while Figure S2 is now Figure 8.

We thank the reviewer for their thoughtful critiques and his time and consideration.

Kind Regards,

Mariano Morales (corresponding author)
