We thank Patrick De Deckker for their thorough review of this manuscript and their positive feedback. The suggestions will greatly improve the readability of the manuscript as well as the interpretation of the data.

We will make the major edits to Figure 4 as suggested by the reviewer, as well as further discuss Figures 3 and 5 in the text as suggested. Changes to the comparison of records in Figure 4 will flow through to the interpretation of the data which we will edit in the text accordingly. We will also implement all grammatical edits.
