Community comment on "Qualitative and quasi-quantitative monitoring of drinking water through the use of a smart electronic tongue" by Alvaro Arrieta et al., Drink. Water Eng. Sci. Discuss., <https://doi.org/10.5194/dwes-2021-12-CC2>, 2022

---

Overall, the article presents a good approach and a seemingly effective solution to the issue of quality control of drinkable water in hard to reach regions using novelty research topics. I see a lot of potential, and not only academic wise.

Apart from that, the english has to be improved, there are minor mistakes that could be easily corrected, also I would have liked to have more information on the traditional methods and how they compare with the proposed one.

good luck!
