Author comment on "Predicting turbidity and Aluminum in drinking water treatment plants using Hybrid Network (GA- ANN) and GEP" by Ruba Alsaeed et al., Drink. Water Eng. Sci. Discuss., <https://doi.org/10.5194/dwes-2021-8-AC6>, 2021

Doctor Amin Hasanlipou Shahrabadi

Thank you for mentioning that methods that were used (GEP and hybrid GA -ANN) were new in solving this kind of problems as you said there are some articles that worked with Fuzzy systems and GMDH.

You are right figure 8 needs to be more clear, I have fixed this

and also adjusted the abstract in one paragraph

I have attached a file showing the changes

thank you

Please also note the supplement to this comment:
