Community comment on "Predicting turbidity and Aluminum in drinking water treatment plants using Hybrid Network (GA- ANN) and GEP" by Ruba Alsaeed et al., Drink. Water Eng. Sci. Discuss., <https://doi.org/10.5194/dwes-2021-8-CC10>, 2021

---

professor Adanan

the program used to make figure 3 is Orange 7. It helped to match 4 different things

a number of neurons, MSE, the function of the hidden layer, the function of the output layer .

and as you mentioned, figure 7 needs to be more clear

I attached a photo of the edited figure

Thanks for your comments
