Author comment on "Oblique rifting triggered by slab tearing and back-arc extension: the case of the Alboran rift in the eastern Betics" by Marine Larrey et al., EGUsphere, https://doi.org/10.5194/egusphere-2022-1166-AC1, 2022

Thank you for pointing out this work which also emphasizes the role of transtension in the depositional evolution of the intramontane basins.
