Comment on egusphere-2022-137

Christopher Campe

Community comment on "Environmental Controls on Observed Spatial Variability of Soil Pore Water Geochemistry in Small Headwater Catchments Underlain with Permafrost" by Nathan Alec Conroy et al., EGU sphere, <https://doi.org/10.5194/egusphere-2022-137-CC1>, 2022

I thought this was a skillful application of equilibrium models to likely non-equilibrium data (mineral solubility in natural redox reactions) and a showcase of the usefulness of PhreePlot's iterative capabilities in finding trends in a messy natural system. Thank you, I enjoyed learning from this paper.
