Community comment on "An improved method of the Globally Resolved Energy Balance Model by the Bayes network" by Zhenxia Liu et al., EGU sphere,
<https://doi.org/10.5194/egusphere-2022-138-CC2>, 2022

If you really believe that your proposed methodology can IMPROVE existing climate models, then why don't you call your paper something like "How to improve existing climate models using a Bayes network". Then in the text you could list all the steps that need to be taken as implied by your methodology, and then you could illustrate how an actual climate forecast was improved using your methodology, if you have a numerical example that could do so. clearly, if you can succeed at doing this the climate modelers will have to take notice and respond to your claims.
