Community comment on "The modelled climatic response to the 18.6-year lunar nodal cycle and its role in decadal temperature trends" by Manoj Joshi et al., EGUsphere, https://doi.org/10.5194/egusphere-2022-151-CC1, 2022

The author invited me to comment.

Informal referencing for "vol/sol" at around line 105.

On that paragraph topic, if the author intends to cite past work relating solar cycle forcing explorations for climate projections with lags of 2 to 3 years or more, it seems incumbent that he cite this work that I authored.
