Author comment on "Geophysical analysis of an area affected by subsurface dissolution – case study of an inland salt marsh in northern Thuringia, Germany" by Sonja Halina Wadas et al., EGUsphere, https://doi.org/10.5194/egusphere-2022-164-AC1, 2022

Author response to reviewer and editor comments

We would like to thank the Editor, Elias Lewi, and the two reviewers, Alireza Malehmir and one anonymous, for their useful comments that helped to improve the manuscript. We have tried to answer all comments and questions as best as we could and incorporated them into the manuscript accordingly.

A detailed tabular overview of the reviewer comments, sorted by chapters, and our corresponding answers, together with a manuscript version with the highlighted changes (tracked changes) can be found in the attached Zip-Folder 'Table of Comments & Answers & Manuscript with tracked changes'.

With best regards,
Sonja Halina Wadas - on behalf of all Co-Authors
