Comment on egusphere-2022-179
Travis O'Brien (Editor)

Editor comment on "Intercomparison of four tropical cyclones detection algorithms on ERA5" by Stella Bourdin et al., EGUsphere, https://doi.org/10.5194/egusphere-2022-179-EC1, 2022

Dear Dr. Bourdin et al.,

Please note that one of the reviewers posted their comments as a community comment (CC1) and one posted it as a reviewer comment (RC1). I am working with Copernicus editorial staff to close the discussion stage, at which point you will get formal instructions for proceeding. In the interim, you should prepare to submit formal responses to both reviewers and you should prepare a revised version of the manuscript that addresses all sets of comments.

Thank you!

- Travis-
