Referee comment on "Strato-structural evolution of the deep-water Orange Basin: constraints from 3D reflection seismic data" by Nombuso G. Maduna et al., EGU sphere, <https://doi.org/10.5194/egusphere-2022-180-RC3>, 2022

---

In fairness to the authors, they are using commercially acquired and processed seismic data. The processing and resolution of the data is typical for such surveys, but different to that acquired for focussed studies of shallow sea floor sediments where higher resolution data might be acquired
