Comment on egusphere-2022-182
Virginie Pinel (Editor)

Editor comment on "Anatomy of a High-Silica Eruption as Observed by a Local Seismic Network: The June 2011 Puyehue-Cordón Caulle Event (Southern Andes, Chile)" by Daniel Basualto et al., EGUsphere, https://doi.org/10.5194/egusphere-2022-182-EC1, 2022

Two reviewers have now provided detailed comments on your manuscript. They are both positive about the scientific interest of your study and the clarity of the writing. However, they have recommended that some specific points be clarified, particularly with regard to the methodology followed. I suggest that you address these points in particular, on the calculation and physical interpretation of the evolution of the b-value, before submitting a revised version of your manuscript, which should then represent a significant contribution to the field.
