Reply on AC2
Gustavo Marques et al.

Author comment on "NeverWorld2: An idealized model hierarchy to investigate ocean mesoscale eddies across resolutions" by Gustavo Marques et al., EGUsphere, https://doi.org/10.5194/egusphere-2022-186-AC3, 2022

There was a typo in the DOI for the data set on our previous reply. The correct address is https://doi.org/10.26024/f130-ev71, which is now active.

Apologies for this mistake.
