Editor comment on "Numerical Modeling Investigation of Flushing Characteristics and Water Age in a Highly Stratified estuary: Mobile Bay, Alabama, U.S.A." by Gaurav Savant and Tate O. McAlpin, EGU sphere, <https://doi.org/10.5194/egusphere-2022-199-EC1>, 2022

Dear Authors

You have seen and responded to the reviewers comments. However, you should incorporate enough of your response in the revised manuscript to make it self-contained; it should explain how your work differs from and advances on previous studies. Please do not rely on the discussion for that.

Yours sincerely

John Huthnance (editor)
