Comment on egusphere-2022-217

Danil Sapronov

Community comment on "Drone-towed controlled-source electromagnetic (CSEM) system for near-surface geophysical prospecting: on instrument noise, temperature drift, transmission frequency, and survey set-up" by Tobias Bjerg Vilhelmsen and Arne Døssing, EGU Sphere, <https://doi.org/10.5194/egusphere-2022-217-CC1>, 2022

Dear Lev Eppelbaum,

I have read your preprint and it interested me a lot.

I am a newbie in Drone-towed CSEM systems, so I am more like electrical engineer who is trying to understand how they work.

Could you please give me some technical details of your UAV based device to help me figure it out.

Best regards,

Danil Sapronov
