Author comment on "A comparison of straight-ray and curved-ray surface wave tomography approaches at near-surface studies" by Mohammadkarim Karimpour et al., EGUsphere, https://doi.org/10.5194/egusphere-2022-279-AC4, 2022

Thank you for your comment.

As you mentioned correctly, the observed difference is due to the wrong ray paths in the straight-ray approach. we have discussed it in lines 324-327 of the revised version of the manuscript.
