Author comment on "Cryo-seismicity triggered by ice mass discharge through the Antarctic subglacial hydrographic network" by Stefania Danesi et al., EGUsphere, https://doi.org/10.5194/egusphere-2022-29-AC1, 2022

Reply to Referee 1:

Dear Referee

we are grateful for your positive comments.

We have changed the manuscript in accord with your requests:

page 2, line 62; Bannister and Kennett (2002); This article is not included in the References. Please add.

Yes, thank you. Done

Figure 2: We cannot identify the exact location of the ice-rader profile on the map above. Please add the profile location.

Done

Figure 5. B) Ravels for Cl_0x, Cl_0y, Cl_z, etc. Please add the one-order number. We cannot identify which clusters are the ones.
