Chief editor comment on "Wind work at the air-sea interface: a modeling study in anticipation of future space missions" by Hector S. Torres et al., EGU sphere, <https://doi.org/10.5194/egusphere-2022-294-CEC2>, 2022

Dear Dr Torres,

Unfortunately, we do not update the files during a stage in the review process. In this way, the fact that you have sent the journal a new version of the paper with the modified sections does not make this information available to the reviewers and any other person who could want to check your work.

Therefore, you must publish the new information in the Discussions forum, for example, in reply to this comment. This way, the repositories, code and data will be available to anyone, as they must be, following our editorial rules.

Please, do it as soon as possible.

Best regards,

Juan A. Añel
