Author comment on "Current observed global mean sea level rise and acceleration estimated from satellite altimetry and the associated uncertainty" by Adrien Guérou et al., EGUisphere, https://doi.org/10.5194/egusphere-2022-330-AC1, 2022

Dear Thomas,

Thank you very much for your review.

We started to take into considerations your suggestions and comments and will answer your questions as soon as we receive the second review to optimize the modifications of the paper.

Regards,

Adrien et al.
