Comment on egusphere-2022-391

Geoff Pegram (Referee)

Referee comment on "A storm-centered multivariate modeling of extreme precipitation frequency based on atmospheric water balance" by Yuan Liu and Daniel B. Wright, EGU sphere, <https://doi.org/10.5194/egusphere-2022-391-RC1>, 2022

Morin-Liu-egusphere-2022-391

HESS by any other name!

I could find only two minor 1-word corrections in all of the 13905 +/- words in the article:

- 'hewing' in line 334, which means 'cutting or chopping' (in the Concise Oxford Dictionary) to be replaced. Try "cleaving" = 'stick fast' or 'adhere to' [COD again]
- 'from all the co-authors' in line 659 , to be replaced by 'from BOTH the authors'!

These are the ONLY words I want to alter that I can find need treatment in this article. Nice work – I have never found such precision in all my 300+ reviews. Bravo! Good interesting and cloud breaking (!) paper.

I will ask the Editor to accept the submission after these minor glitches have been attended to.

Geoff Pegram
