Konstantinos Papadakis et al.

Author comment on "Spatial filtering in a 6D hybrid-Vlasov scheme to alleviate adaptive mesh refinement artifacts: a case study with Vlasiator (versions 5.0, 5.1, and 5.2.1)" by Konstantinos Papadakis et al., EGU sphere,
<https://doi.org/10.5194/egusphere-2022-420-AC1>, 2022

In the "Code and Data Availability section" of your manuscript, you state that the code for your work is archived on GitHub. Admittedly, later in the references, a ZENODO repository is cited, as you addressed the previous comments by the Topical Editor. However, the mentioned section must contain this information about the permanent repository. Therefore, please, in a potential reviewed version of your manuscript modify the 'Code and Data Availability' section, including the DOI of the Zenodo repository.

We wish to thank the executive editor for reading our manuscript and pointing out that our permanent repository is not included in the 'Code and Data Availability' section. We have revised that section in our update version of the manuscript to include our Zenodo reference DOI as well.
