Chief editor comment on "Using machine learning algorithms to analyze remote sensing and ground-truth Lake Chad’s level data" by Kim-Ndor Djimadoumngar, EGUsphere, https://doi.org/10.5194/egusphere-2022-427-CEC2, 2022

Dear Kim-Ndor,

Thanks for your reply. Unfortunately, you are wrong. In our Discussions process, anyone can be a reviewer, not only those invited by editors. Therefore, the code must be available to anyone. We will reject your manuscript if you do not provide the code fully open at this stage. Indeed, it should have never been published in Discussions with such shortcomings; This was an oversight by the topical editor, and we apologize for it.

Regards,

Juan A. Añel

Geosci. Model Dev. Executive Editor
