Dear Dr. Añel
Geosci. Model Dev. Executive Editor,

Thank you for letting us publish the code and continue with the publishing process. We made the code available to pre-process the data, train the neural network and then post-process the data. The evaluated data is published on Zenodo (see the documentation on GitHub (https://github.com/RudigerBrecht/Improving-trajectory-calculations-using-SISR). Moreover the code is also available on Zenodo (https://doi.org/10.5281/zenodo.7065139). Furthermore, we updated the Code and Data Availability statement, because the input data is not freely available.

Please let us know if there is anything else that we can improve.

Regards,
The authors
