Author comment on "UVBoost (v0.5): an erythemal and vitamin D-weighted ultraviolet radiation estimator based on a machine learning gradient boosting algorithm" by Marcelo de Paula Corrêa, EGUsphere, https://doi.org/10.5194/egusphere-2022-465-AC2, 2022

Dear Dr. Dr Juan A. Añel, GMD Exec. Editor

Hereby I submit my revised manuscript for consideration for publication in the GMD or, if you deem it more suitable, for recommendation to the journal EGU ESSD.

You and reviewers asked pertinent questions and made suggestions that have been addressed in this new version of the manuscript.

A point-by-point explanation of how I responded to the formal comments of reviewers will be on the following replies.

Thank you for your consideration and I hope to hear from you soon.
Sincerely,

Marcelo de Paula Corrêa
