M. James McLaughlin et al.

Author comment on "Production and accumulation of reef framework by calcifying corals and macroalgae on a remote Indian Ocean cay" by M. James McLaughlin et al., EGU sphere, <https://doi.org/10.5194/egusphere-2022-467-AC1>, 2022

We thank reviewer RC1 for their insightful and considered comments and suggestions. We have made significant changes to the introduction and discussions sections to address some of the constructive criticisms provided by RC1, which we think adds considerable value and strengthens our manuscript. We have sought to address all of the specific comments and questions that RC1 has provided in the supplemental document attached.

Please also note the supplement to this comment:
