Author comment on "On the use of IASI spectrally resolved radiances to test the EC-Earth climate model (v3.3.3) in clear-sky conditions" by Stefano Della Fera et al., EGU sphere, <https://doi.org/10.5194/egusphere-2022-479-AC1>, 2022

---

Dear editor,

Thanks for the further information and suggestions.

As discussed before, we were already working with the sigma-iasi authors for the publication of the code in an accessible repository.

Thanks to the sigma-iasi authors, the code is now available on Zenodo at <https://zenodo.org/record/7019991#.YwiMtXZBxD9> . I will add this information in the code-availability section in the next reviewed version of the manuscript.

Please, let us know if this action addresses the question with GMD guidelines.

Thanks again.
