Community comment on "Review article: Design and Evaluation of Weather Index Insurance for Multi-Hazard Resilience and Food Insecurity" by Marcos Roberto Benso et al., EGU sphere, <https://doi.org/10.5194/egusphere-2022-498-CC1>, 2022

This manuscript is very interesting and using economical methods like insurance to mitigate the hazard is necessary under climate change context. I think this manuscript need to focus and strengthen the main point through analysis of current research, and answer the five questions mentioned in the manuscript strictly, thus the manuscript may be more interesting.
