Author comment on "Monitoring Urban Heat Island Intensity based on GNSS tomography technique" by Pengfei Xia et al., EGUsphere, https://doi.org/10.5194/egusphere-2022-589-AC1, 2022

Thank you very much for your review of the manuscript. At present, we also encounter many difficulties, such as improving the spatial resolution of temperature and how to improve the accuracy of temperature. If you are also interested, we can communicate and discuss more to solve the above problems in the future.
