Community comment on "Monitoring Urban Heat Island Intensity with Ground-based GNSS Observations and Space-based Radio Occultation and Radiosonde Historical Data" by Pengfei Xia et al., EGU Sphere, <https://doi.org/10.5194/egusphere-2022-589-CC1>, 2022

I've been working on GNSS meteorological remote sensing for a while now; it's a fascinating subject and offers a fresh way to use GNSS observations for monitoring urban heat islands. It really is a unique thought.
