
Dear authors,

Checking the data availability of your manuscript, and after a check of the terms of b2share, it has come out that we can not accept it as a suitable repository. In terms of service, b2share states that data storage is only assured for two years, and such a period is not enough. We usually request a minimum of ten years, ideally twenty.

Therefore, please, could you change the repository to a suitable one? For example, we could accept Zenodo.org, PANGAEA or FigShare.

Many thanks,

Juan A. Añel
