Comment on egusphere-2022-658

Xin Liang

Community comment on "A new analytical method for stability analysis of rock blocks with cavity in sub-horizontal strata by considering eccentric effect" by Xushan Shi et al., EGU sphere, <https://doi.org/10.5194/egusphere-2022-658-CC2>, 2022

This work is interesting. As a comment phenomenoe in moutain area, how to determain the failure possibility of rockfall is critical to risk assessment. The proposed method for Fos is a new ideal.
