Comment on egusphere-2022-690

Juan Antonio Añel

Chief editor comment on "Hydrological modelling on atmospheric grids: using graphs of sub-grid elements to transport energy and water" by Jan Polcher et al., EGU sphere, <https://doi.org/10.5194/egusphere-2022-690-CEC1>, 2022

Dear authors,

Unfortunately, after checking your manuscript, it has come to our attention that it does not comply with our "Code and Data Policy".

https://www.geoscientific-model-development.net/policies/code_and_data_policy.html

You have archived your code on a Gitlab repository in a server of the French Research organisations. However, this is not a suitable repository, as our policy clearly states. Therefore, please, publish your code in one of the appropriate repositories, and reply to this comment with the relevant information (link and DOI) as soon as possible, as it should be available for the Discussions stage. Moreover, you must include in a potential reviewed version of your manuscript the modified 'Code and Data Availability' section, with the DOI of the code.

Also, the Gitlab repository says that the code has no license. If you do not include a license, the code is not "freely available" despite what you claim in the manuscript. It continues to be your property, and all the rights are reserved, as the Gitlab repository says. We can not accept this, and if you do not change it, your manuscript will be immediately rejected for publication.

Therefore, when uploading the code to one of the suitable repositories, you could want to choose a free software/open-source (FLOSS) license. We recommend the GPLv3. You only need to include the file '<https://www.gnu.org/licenses/gpl-3.0.txt>' as LICENSE.txt with your code. Also, you can choose other options that Zenodo provides: GPLv2, Apache License, MIT License, etc.

Please, be aware that failing to comply promptly with this request will result in rejecting your manuscript for publication.

Regards,

Juan A. Añel

Geosci. Model Dev. Exec. Editor
