Comment on egusphere-2022-699

Juan Antonio Añel

Chief editor comment on "The Stochastic Ice-Sheet and Sea-Level System Model v1.0 (StISSM v1.0)" by Vincent Verjans et al., EGU sphere,
<https://doi.org/10.5194/egusphere-2022-699-CEC1>, 2022

Dear authors,

Unfortunately, after checking your manuscript, it has come to our attention that it does not comply with our "Code and Data Policy".
https://www.geoscientific-model-development.net/policies/code_and_data_policy.html

You have archived your code on NASA and UCI repositories. However, they are not suitable for scientific publication. You must use other long-term archival and publishing alternatives (see our policy for options). Therefore, please, publish your code in one of the appropriate repositories, and reply to this comment with the relevant information (link and DOI) as soon as possible, as it should be available for the Discussions stage. In this way, you must include the modified 'Code and Data Availability' section in a potential reviewed version of your manuscript, including its DOI. Also, remember to include a license for the code in the new repository. If you do not include a license, despite what you state, it continues to be your property and third parties can not use it.

Please, be aware that failing to comply promptly with this request could result in rejecting your manuscript for publication.

Regards,

Juan A. Añel

Geosci. Model Dev. Exec. Editor
