Editor comment on "Modeling the inhibition effect of straw checkerboard barriers on wind-blown sand" by Haojie Huang, EGU sphere,  
<https://doi.org/10.5194/egusphere-2022-714-EC1>, 2022

---

Dear Authors,

The manuscript has now attracted two comprehensive reviews. The referees have raised a number of important questions and concerns about the study, both in terms of the simulations themselves as well as the presentation of the results, and the paper will require major revisions followed by another round of reviews. I suggest that you reflect on the issues raised by the referees to consider whether more research and analysis work may be required to improve the study , OR whether you believe all the issues can be addressed by better discussion and presentation of the current results in a revised manuscript.

Kind regards,

Andreas Baas  
Handling Editor
