Chief editor comment on "Estimation of CH4 emission based on advanced 4D-LETKF assimilation system" by Jagat S. H. Bisht et al., EGUsphere,  

Dear authors,

I have checked the Zenodo repositories, and I have not found the LETKF_DA_GUIDE that you mention. Could you have missed it? If not, please, could you be more explicit about where we can find it?

Also, some of your data files are in binary format (.bin). Can you clarify what kind of software is necessary to read them?

Many thanks,

Juan A. Añel
