Editor comment on "Estimation of CH$_4$ emission based on advanced 4D-LETKF assimilation system" by Jagat S. H. Bisht et al., EGUsphere, https://doi.org/10.5194/egusphere-2022-719-EC2, 2022

Dear authors,

The LETKF system set-up user guide looks clear to me. However, since MIROC4-ACTM Zenodo account contains only the CH4 simulation module, it is not clear to me which version of the MIROC model you are using.

Considering the license issue of the MIROC model, it is accepted that access to Zenodo for MIROC is restricted. However, please grant me access to the MIROC model you used in this study so we can make sure that all the results presented in this manuscript are reproducible.

Thank you.

Shu-Chih
