Comment on egusphere-2022-859
Juan Antonio Añel

Chief editor comment on "CLGAN: A GAN-based video prediction model for precipitation nowcasting" by Yan Ji et al., EGUsphere, https://doi.org/10.5194/egusphere-2022-859-CEC1, 2022

Dear authors,

Unfortunately, after checking your manuscript, it has come to our attention that it does not comply with our "Code and Data Policy". https://www.geoscientific-model-development.net/policies/code_and_data_policy.html

Your manuscript states that you have archived the code and data necessary to replicate your study in Zenodo. However, the text does not indicate how to reach such a repository; therefore, this is the same that does not publish it.

Your manuscript should have never been published in Discussions with such a shortcoming. However, now that this oversight by the Topical Editor has happened, we are offering you the possibility to solve it. In this way, you must publish a reply to this comment as soon as possible with the link and DOI of the suitable repository, according to our policy, where the code and data are stored.

Otherwise, we will have to end the Discussion stage and reject your manuscript for publication.

Best regards,

Juan A. Añel

Geosci. Model Dev. Executive Editor
