Referee comment on "A comprehensive open-source course for teaching applied hydrological modelling in Central Asia" by Beatrice Sabine Marti et al., EGUsphere, https://doi.org/10.5194/egusphere-2022-966-RC1, 2022

This study describes a comprehensive open-source course for teaching hydrologic modeling. It appears that the course has been well developed and tested, hence providing good experience that would benefit the others who teach hydrologic modeling like myself. It is very well written and easy to follow. I recommend acceptance as is.
