Author comment on "A methodology for the spatiotemporal identification of compound hazards: wind and precipitation extremes in Great Britain (1979–2019)" by Aloïs Tilloy et al., Earth Syst. Dynam. Discuss., <https://doi.org/10.5194/esd-2021-52-AC1>, 2022

We thank anonymous referee # 1 for their time in reading and commenting critically on our manuscript ESD-2021-52 "A Methodology for the Spatiotemporal Identification of Compound Hazards: Wind and Precipitation Extremes in Great Britain (1979–2019)". We believe that the changes to our manuscript based on the reviewer comments will significantly improve it, and we hope this will be of use to the broader natural hazards' community. In the attached document we respond in detail to the reviewer, first outlining the comments, and then our reply.

Please also note the supplement to this comment:
