Author comment on "Refined burned-area mapping protocol using Sentinel-2 data increases estimate of 2019 Indonesian burning" by David L. A. Gaveau et al., Earth Syst. Sci. Data Discuss., <https://doi.org/10.5194/essd-2021-113-AC1>, 2021

We are grateful for the astute comments raised by Referee #1 as they have helped us clarify and improve the manuscript. We answer against each point in the attached pdf document. The document includes several additional figures and tables.

Please also note the supplement to this comment:
