Comment on essd-2021-142
Lore T. Verryckt et al.

Author comment on “Vertical profiles of leaf photosynthesis and leaf traits and soil nutrients in two tropical rainforests in French Guiana before and after a 3-year nitrogen and phosphorus addition experiment” by Lore T. Verryckt et al., Earth Syst. Sci. Data Discuss., https://doi.org/10.5194/essd-2021-142-AC2, 2021

We thank reviewer 2 for their positive assessment of our manuscript.

We agree with the referee that we should add some figures showing the main results of the photosynthesis and soil data. We will provide these figures in the revised manuscript, and we will put the data more into context in the manuscript.
However, we do not agree with the referee’s first comment, since this manuscript is a data description paper and, therefore, detailed analysis of the data are outside the scope.
