Comment on **essd-2021-158**

Henrik Nøhr-Hansen (Referee)

Referee comment on "DINOSTRAT: a global database of the stratigraphic and paleolatitudinal distribution of Mesozoic–Cenozoic organic-walled dinoflagellate cysts" by Peter K. Bijl, Earth Syst. Sci. Data Discuss., <https://doi.org/10.5194/essd-2021-158-RC1>, 2021

Congratulation Peter with a fantastic major and useful database paper, which I recommend published after few technical corrections. Especially is the huge amount of information in the supplement data very useful.

Please, check your references and please be consistent using dinoflagellate cysts or dinocyst.

I have written my few comments in the enclosed pdf version of your manuscript.

Best wishes

Henrik Nøhr-Hansen
