Comment on essd-2021-352
Anonymous Referee #1

Referee comment on “Towards improved analysis of short mesoscale sea level signals from satellite altimetry” by Yves Quilfen et al., Earth Syst. Sci. Data Discuss., https://doi.org/10.5194/essd-2021-352-RC1, 2021

Dear all,

After revising the article “Towards improved analysis of short mesoscale sea level signals from satellite altimetry” (Authors: Yves Quilfen, Jean-François Piolle, and Bertrand Chapron), my opinion is that the manuscript can be published as it is.

I found this paper very relevant and complete.

Best regards,

Dr. Sonia Ponce de Leon A.
